

Unit 4B Habitats.

Year 4.

5. Protecting Habitats.

Activities: Ask the children to think about the effect on plants and animals of changes in conditions to a specific habitat. eg: draining a pond, removing shade.

Get the children to work in groups to prepare a presentation to an audience to explain the effect of changes to a habitat

Or

Write a letter opposing changes that would alter a habitat.

Outcomes : identify the effects of changes to the habitat on some organisms.

Objectives:

to recognise ways in which living things and the environment need protection.
